

SOP 2.2.1 SANITATION

This standard operating procedure (SOP) can be used as a template.
If you develop your own version, all required elements must be included.

PID#:

Site manager: Person in charge:

PROTOCOL

This SOP must include at least one cleaning, one washing and one disinfection measure, and must be applied at least once every 12 months to each area of the barn(s), either after each batch (all-in, all-out), when pigs are moved to another section of the barn, or when weather conditions permit.

List the production stage(s) at which this SOP is applied:

Sanitation Measures	Applied On-Farm	Importance
